

# Cuff Studio

## Installation Instructions:

### Rope Wrapped Globe (single globe)

Handmade in Los Angeles, the Cuff Studio Rope Wrapped Globes are a versatile fixture that can be installed in varied arrangements based on your needs and the space. Use one globe, or many, to create the desired look for your lighting installation. The combinations and configurations are endless—so have fun with it!

1. Ensure that j-box can sustain the overall weight of fixture. Reinforce if necessary.
2. Feed electrical wires through provided threaded pipe.
3. Attach all respective electrical wires to ceiling housing.
4. Attach provided threaded pipe to j-box, and slip canopy over threaded pipe. Then attach main pendant loop to threaded pipe and canopy.
5. Raise the cotton knot to the canopy. Add a zip tie to the base of the knot as needed to keep knot in place.
6. Additional plastic zip ties may be used as desired to fasten the wire to the cotton rope so that rope and wire are snugly aligned.
7. After each zip tie is applied, trim the zip tie tale. Extra zip ties are provided. Apply zip ties per installer discretion, but typically 2-3 zip ties are used per foot of rope/wire.

Care: Dust regularly with a soft dry cloth or feather duster. Do not use a wet cloth or any chemical cleansers. Professional installation by a certified electrician recommended.
